What's all the RUCKUS about?

Form, Function and Mobility - KI, one of our top suppliers is at it again - they've created a great product line for traditional and collaborative style 21st-century classrooms. The Ruckus Collection represents the concept of movement essential to cognitive development and learning. If your school is seeking to incorporate a diverse teaching style, foster student engagement or be able to change their classroom on-the-fly, consider the versatility of this collection. You can find this and many more classroom selections by shopping National Business Furniture on the TexBuy Marketplace - check it out and find out what all the "Ruckus" is about!

Ruckus 4-Leg Chair with Glides promotes student movement and its generously sized seating. You can choose between standard and upholstered seats for added style and comfort. The ergonomic

handle is molded into the chair backrest for ease of mobility.

Four-Legged Chair with Footrest has a unique design and generous size to encourage an "as you like it" sitting experience that accommodates users of varying proportions. Users can quickly and easily scale from focused

to collaborative work without the need for moving parts or the disruption of rearranging furniture. The non-directional seating improves classroom sight lines and the chair's perch-able back enables tiered classrooms without the need for stools.

Mobile Dual-Sided Locking Six Locker Unit counter-height acts as a place for instructors to give demonstrations, assist students with their projects, or simply as

a prep surface for students or staff who are using the locker to change or put away their items. The unit has two sides of locker storage - users will have more space to move around without feeling crowded.

Mobile Dual Sided Locking Four Locker Unit comes with a laminate top and dual-sided storage. There are two lockers per side - the sides are made of steel and are mounted

on one common steel base for stability. The four casters add mobility for cleaning or moving this unit from room to room.
