

SIX CAPACITOR SYSTEM ELIMINATES THE THREAT OF LIGHTNING

The CMCE-120 Lightning Suppressor eliminates upward streamers by balancing charges between the cloud and ground. This patented process stops lightning from forming.

The CMCE is easily installed on virtually any Structure! A single unit will protect structures, electronics, people, animals, and anything within the protection area from direct lightning strikes.

The technology has been deployed 8,000+ times worldwide without a direct strike in all properly installed and maintained units.

CMCE LIGHTNING SUPPRESSOR SPECIFICATIONS

HEIGHT:	14.9 inches
WIDTH:	9.5 inches
WEIGHT:	17.6 pounds
POWER:	No power required
DURABILITY:	Waterproof Explosion proof Cold / Heat Resistant
EFFECTIVENESS:	100% in field tests 100% in lab tests
COVERAGE RADIUS*:	120 Meters
WARRANTY:	10 Years

*dependent on installed height
